MBX®

MBX® TECHNOLOGY HAS BEEN SPECIALLY DEVELOPED FOR USE IN AUTO, AVIATION, RAIL AND TRANSPORTATION WORKSHOPS. IT REMOVES RUST, CORROSION, OXIDATION, GASKETS, PAINT, UNDERSEAL AND SEALANTS WITH EASE.

LOW
ROTATIONAL
SPEED OF MAX.
3,500
RPM

THE MBX® ADVANTAGE

- ➊ Rapidly removes corrosion and oxidation - both hard and soft material
- ➋ Performs on uneven surfaces
- ➌ Highly flexible in tight areas
- ➍ No clogging or gumming of bristles
- ➎ No grinding or removal of substrate material
- ➏ Efficient cutting action - creates angular profile
- ➐ Cleans surfaces evenly
- ➑ Full visibility of work surface
- ➒ No heat development
- ➓ Long performance life and low cost of operation
- ➔ High safety level

SELECTED MBX® APPLICATIONS

- ➊ Removing corrosion and oxidation, rust and scale
- ➋ Removing paint, protective coatings and sealers
- ➌ Removing vinyl, decals, reflective tape and adhesives
- ➍ Removing slag and weld burn, decontaminating metal surfaces
- ➎ Creating surface textures - from sharp, angular profiles to smooth finish
- ➏ Feathering into existing coatings
- ➐ Roughing fiberglass, plastic or rubber surfaces for repair or bonding
- ➑ Removing residue from industrial, manufacturing or construction operations

THE MBX® TECHNOLOGY

- ➊ The flexible-wire belts rotate in a patented housing, spinning outward with centrifugal force and working on a cushion of air
- ➋ Specially designed bristles are U-shaped staples inserted through a durable nylon belt and provide safe, long lasting performance
- ➌ Bristle tips have a positive rake angle, striking the surface and rebounding in a chiseling action - removing surface coatings and scale but not substrate material
- ➍ Bristle tips are hardened and ground sharp to effectively remove both hard and soft material and create textured surface profiles
